

DPR Korea 2017

Sample and Survey Characteristics

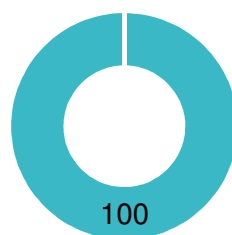

Multiple Indicator
Cluster Surveys

Response Rates

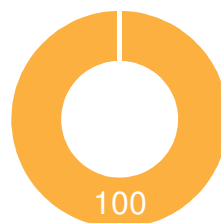

Household

Sampled	8500
Occupied	8500
Interviewed	8499

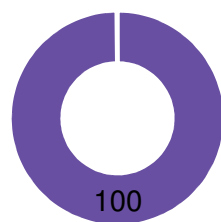

Women age 15-49

Eligible for interview	8766
Interviewed	8763

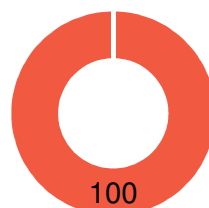

Men age 15-49

Eligible for interview	4183
Interviewed	4179

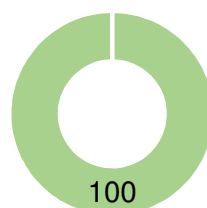

Children under 5

Eligible for interview	2275
Mothers/caretakers interviewed	2275

Children age 5-17

Eligible for interview	4121
Mothers/caretakers interviewed	4121

Survey Implementation

Implementing Agency:
Central Bureau of Statistics

Sampling frame:
2013 Mid - Census

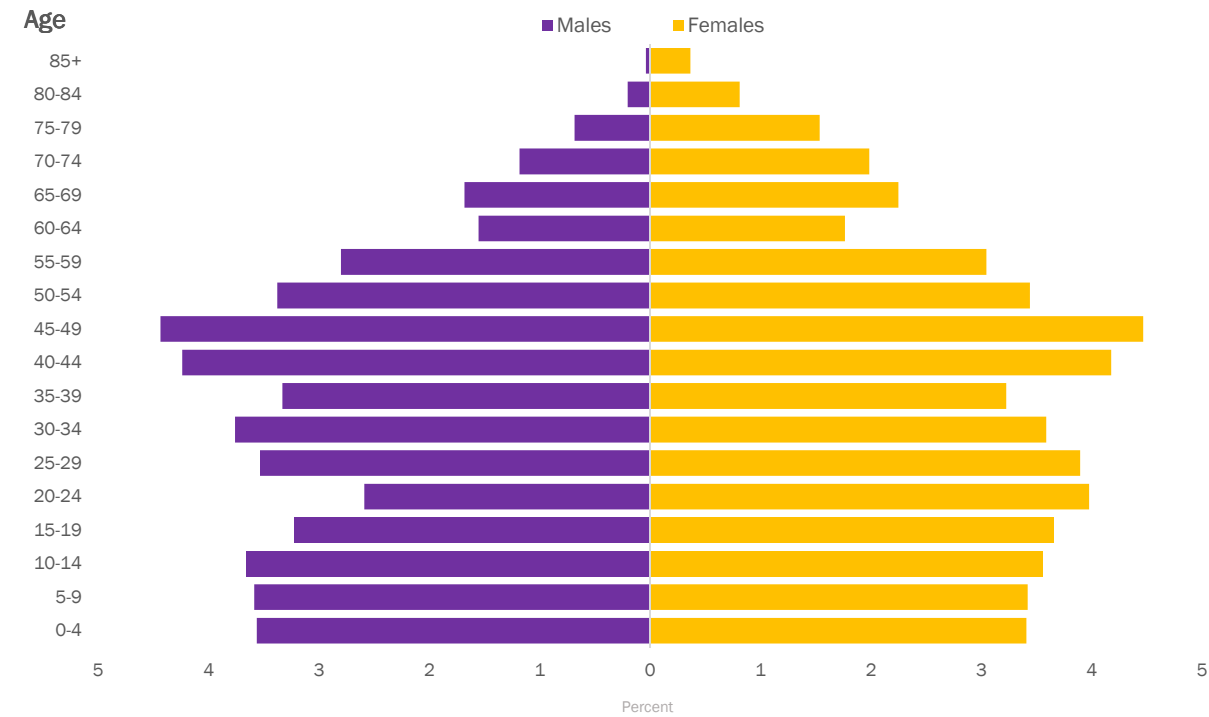

Listing and mapping:
April 2017

Interviewer training:
June – July 2017

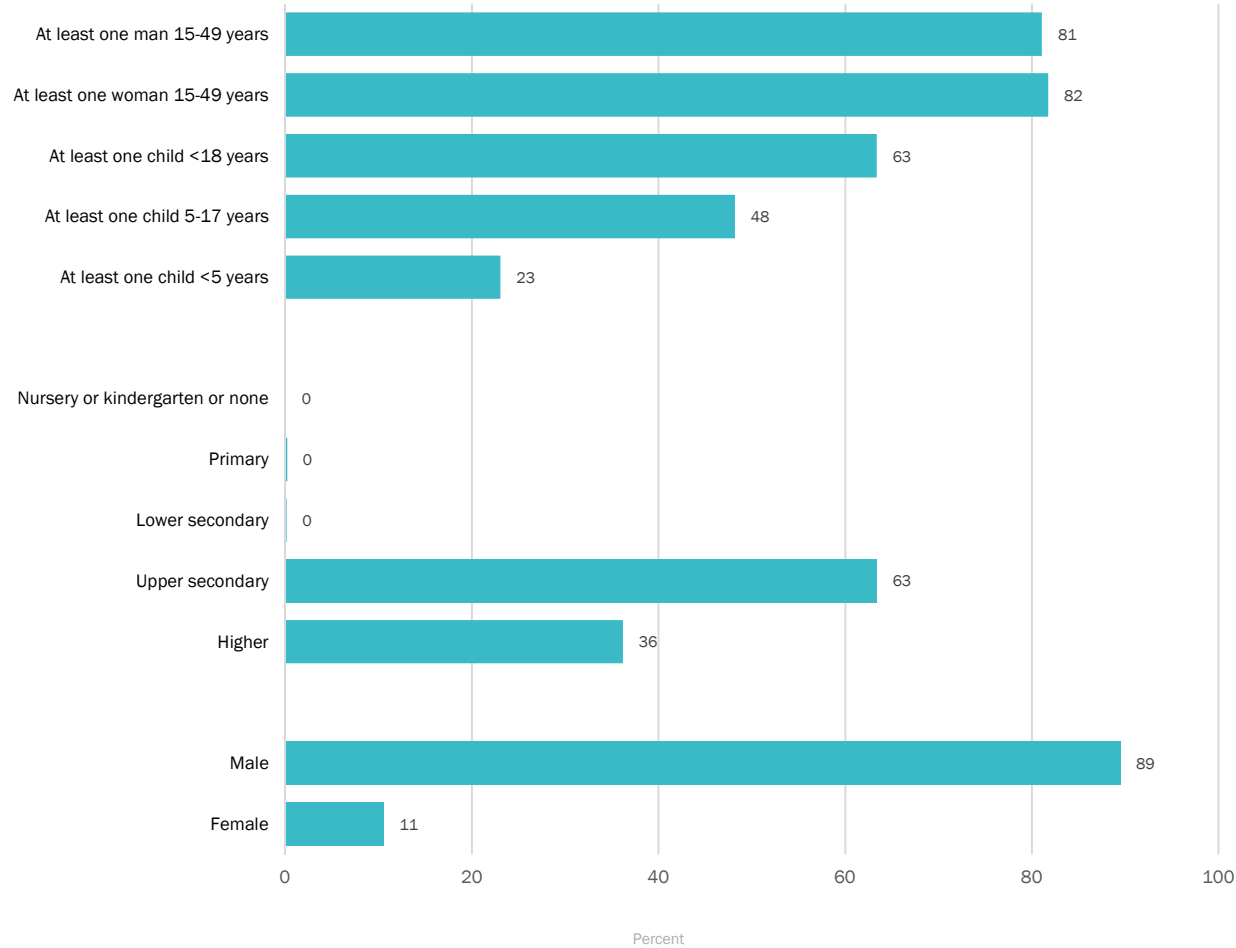

Fieldwork:
August – October 2017

Questionnaires:
Household
Women age 15-49
Men age 15-49
Children under 5
Children age 5-17
Water Quality Testing

Age & sex distribution of household population

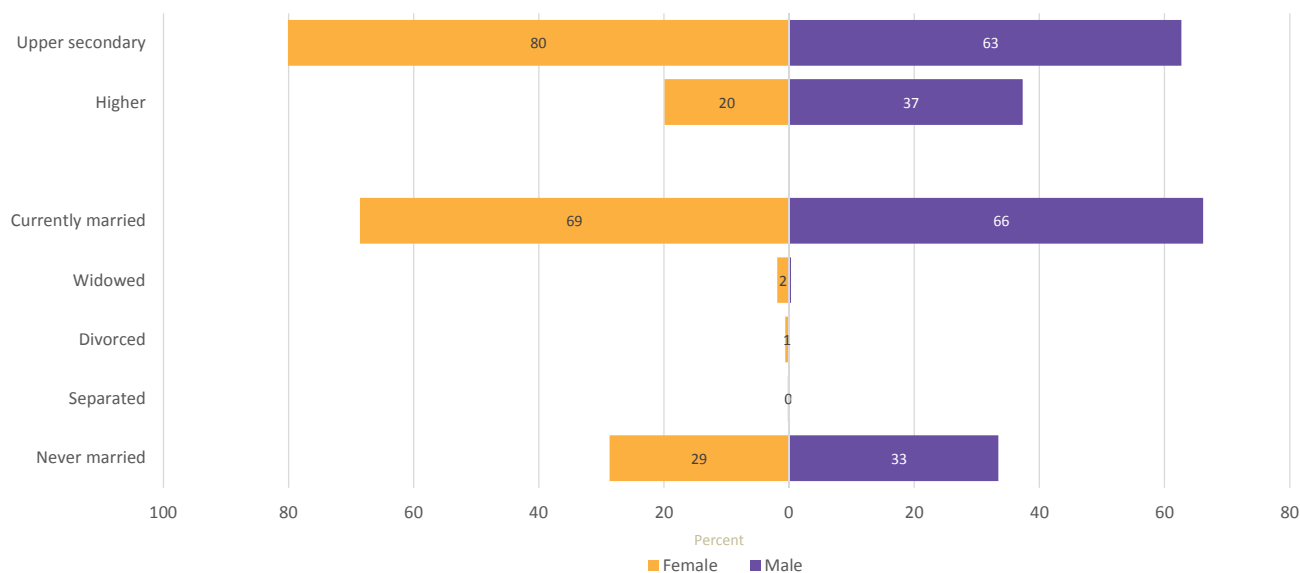

Household Composition & Characteristics of Head of Household

Provincial Distribution of Population in the Sample

Province	Households	Women	Men	Children <5 years	Children 5-17
Ryganggang	3	3	3	3	3

South Hamgyong	13	13	14	13	13
Kangwon	6	6	6	7	7
Jagang	6	6	6	6	6
North Pyongan	12	12	12	12	12
South Pyongan	17	17	16	17	17
North Hwanghae	10	10	10	11	10
South Hwanghae	10	10	10	10	10
Pyonggyang	13	13	13	12	12

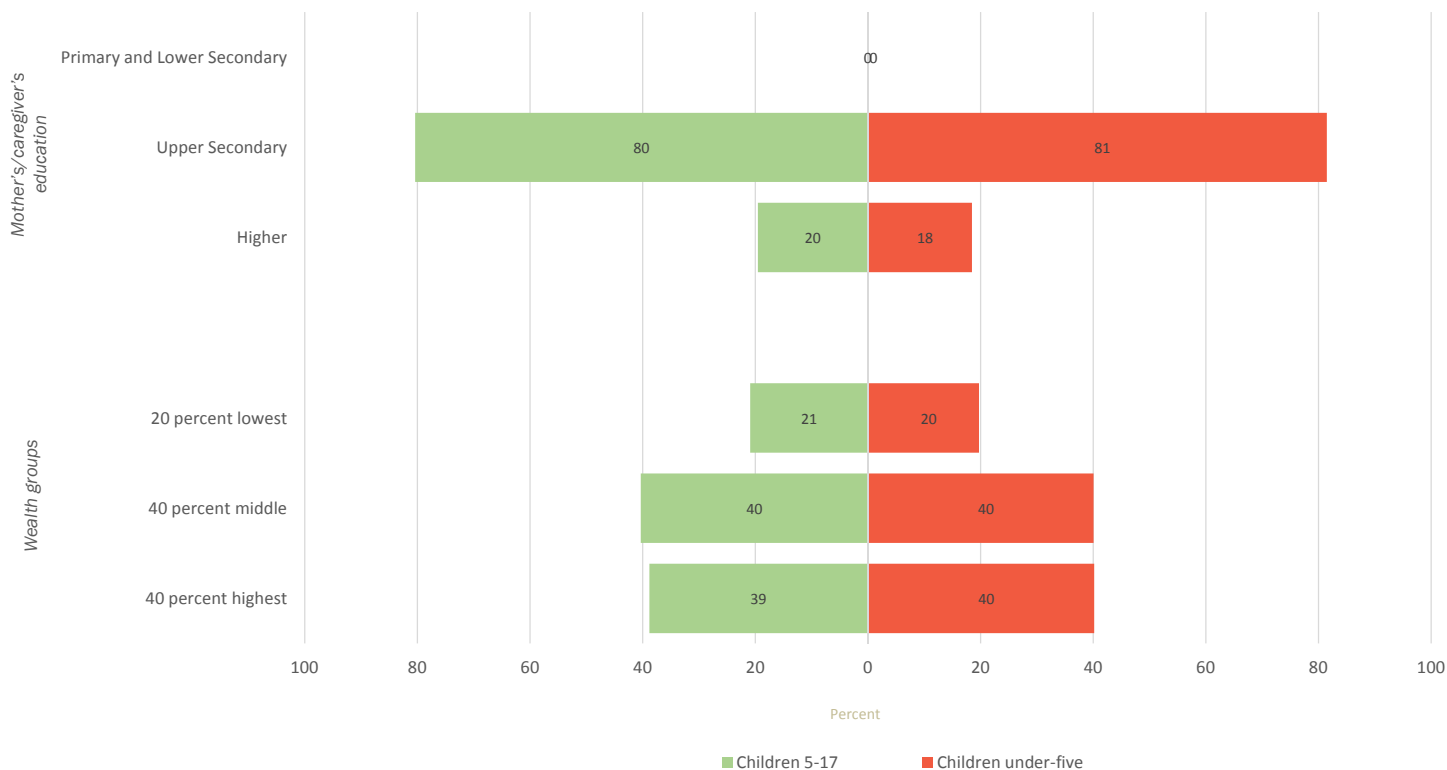

Women & Men's Profile

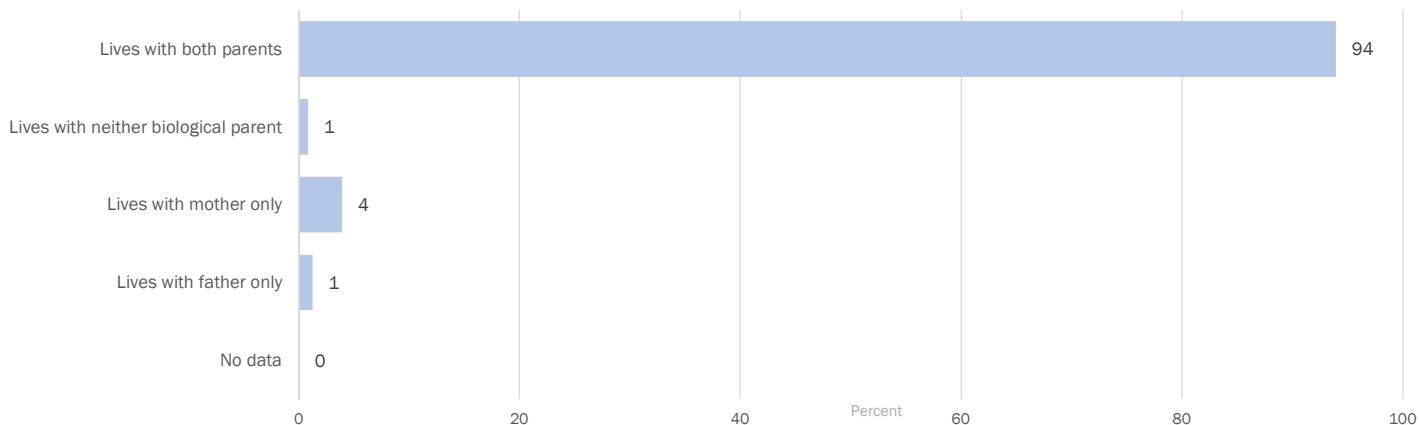

Key Messages

- The response rates for households, eligible men, women, children 5-17 and caregivers of children under 5 are all outstanding, at almost 100 per cent.
- In the age groups 15-19 and 20-24 there is a disproportion in relation between males and females. The percentage of males in these age groups is lower due to the definition of household members used – the males serving in the Korean People's Army were not considered household members and not included in the household listing.
- Three households out of five have at least one child aged 0-17 years. Almost one out of four households has at least one child under 5.
- Only six per cent of children do not live with both their biological parents or live with only one parent. Of the remaining, four per cent live with their mother only.
- One in ten households is headed by a female.
- Four of five children live in the household where mother/caretaker is with upper secondary education. One in five children live in the household where mother/caretaker is with higher education.

Children's Living Arrangements*

*Children 0-17 years

The **DPR Korea** Multiple Indicator Cluster Survey (MICS) was carried out in 2017 by the Central Bureau of Statistics as part of the global MICS programme. Technical and financial support was provided by the United Nations Children's Fund (UNICEF).

The objective of this snapshot is to disseminate selected findings from the DPR Korea MICS 2017 related to survey and sample characteristics. Data from this snapshot can be found in table SR.1.1, SR.5.1W, SR.5.1M, SR.5.2, SR.5.3 and SR.11.1.

Further statistical snapshots and the Survey Findings Report for this and other surveys are available on mics.unicef.org/surveys.
